

Belal Aboelkher

22 Safa-st-el Agami Elhanouvil –Alexandria-Egypt

Dear Mr. / Mrs.,

I am writing to apply for an intern position, as requested I enclose my resume with your application.

The role is very appealing to me, and I believe in my strong technical and non-technical skills and my education make me highly competitive

Candidate to this position the strength keys that support me in this position:

- I was a CEO for ROV (remotely operated vehicle) team in international robotics competition called MATE supervised by NASA and Microsoft in USA in 2018 and the team got the first place over all between 30 teams from different countries and I was Embedded systems engineer in this team else
- I study in Arab academy for science and technology by a full scholarship
- Work in robotics startup as software engineer called “Vortex robotics” for underwater robotics
- have a very good experience in Software and AI and embedded systems

With studying computer science degree, I have a comprehensive understanding of the lifestyle for different tech projects and technologies.

Sincerely,

Belal aboelkher
