

By selecting Agilent Test Equipment you have chosen from the highest quality and performance products in the industry...

Take advantage of Agilent's Extended Maintenance Options to insure for the next 3 or 5 years your equipment is operating to the same high specifications as the day it is shipped to you.

We are delighted to inform you about Agilent's upfront extended warranty and calibration plans to keep your equipment in peak condition by offering the highest value repair and calibration service from the original equipment manufacturer.

Agilent's Upfront Extended Warranty Plans

Although our design and manufacturing processes aim to minimize instrument failure, we know they can still occur unexpectedly. Extended warranty plans provide a **fixed price option at the time of hardware purchase, covering the cost of repairs by Agilent for up to five years.** These plans include:

- Fault location, diagnostics, and repair by Agilent any time a unit fails
- All parts and labor required to complete the repair
- Any adjustments necessary to bring the repaired unit to its full specifications
- A full Calibration including a Cal Certificate and data report
- All shipping and handling costs from Agilent service hubs to your site
- Significant cost savings compared to just one per incident repair:

Model * data for comparison only, subject to change	3 year extended warranty adds this amount to your hardware cost*	Dollars you save compared to cost of a single repair*	% Savings with a 3 year warranty versus the cost of a single repair later*	5 year extended warranty adds this amount to your hardware cost*	Dollars you save compared to the average cost of a single repair*	% Savings with a 5 year warranty versus the cost of a single repair later*
Agilent 34411A Digital Multimeter/Digitizer	3.8%	\$ 545.15	88%	7.7%	\$ 468.31	75%
Agilent 33250A 80 MHz Waveform Generator	1.8%	\$ 985.83	92%	3.7%	\$ 901.67	84%
Agilent 6624A Quad Output Power Supply	0.9%	\$ 2,363.61	97%	1.9%	\$ 2,278.23	93%
Agilent 53131A Counter	3.8%	\$ 940.76	92%	7.7%	\$ 859.52	84%
Agilent E4404B 6.7 GHz Spectrum Analyzer	4.0%	\$ 2,528.36	75%	7.9%	\$ 1,685.72	50%
Agilent E4419B Dual Channel Power Meter	2.1%	\$ 1,022.46	89%	4.3%	\$ 892.91	78%

Agilent's Upfront Calibration Plans

Only Agilent can fully calibrate your hardware to the standard provided by our high quality manufacturing process once the unit has been shipped to you. Upfront calibration plans are available at the time of hardware purchase to completely cover your equipment at the recommended cal intervals. Agilent tests to the same stringent procedures as used by our factories, or, for those requiring specific certifications, Z540 and ISO 17025 calibrations are available on many products. All calibrations are performed by Agilent technical experts at our fully ISO 17025 process compliant service hubs. Purchase of calibration plans upfront are the most economical choice for these services.

Contact Us Now!

An Agilent 3 year or 5 year extended warranty option has already been provided with your current hardware quotation. Please contact your Agilent Field Engineer, or call **Agilent Customer Care at 800-829-4444** to enquire about other choices and to add an Agilent Calibration Service Plan to your purchase.

Remove all doubt

Your equipment restored to like new performance, returned on time
