SUPPLIER'S & MANUFACTURER'S AFFIDAVIT / ORIGIN CERTIFICATION

In order to satisfy U.S. Customs requirements would you please have a **"responsible employee"** of your firm who has sufficient knowledge of the origin of your product to make this certification. Incorrect information is subject to penalties under Government Regulations.

Unless you specify otherwise, the origin information you provide will be based on the current manufacturing information for all such products ever supplied to Monterey Bay Aquarium by your firm. List multiple countries if applicable.

For origin declaration purposes, a "product of the U.S." is an article manufactured in any of the states, the District of Columbia or Puerto Rico. The article may consist wholly of U.S. components or materials, or may contain foreign components. If the article consists wholly or partially of foreign components, the U.S. manufacturing process must be such that the foreign components have been substantially transformed or merged into a new and different article with a new name, character, or use in order to be declared a product of the U.S, and that the articles were exported from the United States without benefit of drawback.
