Engineering Change Order (ECO)

ECO #: ECO- 52143-001

Effective Date: August 16, 2017

Title: Left Angle mini DisplayPort to VGA Cable

Author: Cesar Hernandez
Engineering Approval: aeg
Operations Approval: aeg

Date: August 16, 2017
Date: August 21, 2017
Date: August 21, 2016

Summary:

All Pro4 ICBs with external monitors will include a left angle mini DisplayPort to VGA cable as a replacement to the right angle mini DisplayPort to VGA cable they currently ship with.

Parts Affected:

Part Number	Notes	Removed	Added	Modified
52143	Left Angled 90° Mini DisplayPort DP Male to VGA RGB Male 1.5m	☐	☐	☒

Detail:

All Pro4 ICBs with external monitors ship with a right angle mini DisplayPort to VGA cable as a temporary solution to connect the computer to the external monitor.

This is not ideal, due to the routing of the cable being under the computer.

Left angle mini DisplayPort to VGA cable will be a long-term solution to replace current right angle cable. Revision B under PN 52143 has been created to reflect the change.

Action Item:

Action	Department	Acknowledgement Initials
Include left angle mini DisplayPort to VGA cable PN 52143 with all pro4 systems that require external monitors	Production	KK
Remove right angle mini DisplayPort to VGA cable PN 52374 from production and replace with PN 52143	Inventory	SL
Verify allPro4 system with external monitors include left angle mini DisplayPort to VGA cable PN 52143	QC	KK
