Engineering Change Order (ECO)

ECO #: RAD-KIT-001

Effective Date: July 1, 2016

Title: Whip Length Change

Author: aeg
Engineering Approval: aeg
Operations Approval: JJV

Date: July 1, 2016
Date: July 1, 2016
Date: July 5, 2016

Summary:

The radiation detector whip was lengthened to allow for mounting on the slim mount.

Parts Affected:

Part Number	Notes	Removed	Added	New	Modified
RAD-KIT	Click here to enter text.	☐	☐	☐	☒

Detail:

The 15" protruding whip length was not long enough to mount the accessory on the slim mount skid.

The strip back length (originally 5") was also modified to match what was currently being done in production (4")

The total length now matches the as stocked 9-pin whip (CB9-001M), and does not require trimming the whip to length.

Action Item:

Action	Department	Acknowledgement Initials
Revise drawing	Engineering	AEG
Approve assembly procedure using new wiring diagram	Production	CZ

Modified / Referenced Documents:

Document	Current Revision
RAD-KIT WiringDiagram	1.2

Revision Table:

Revision	Initials	Date	Comments
