

wireless mobile computing **Solutions** for your enterprise

GoBook™

# Itronix: high performance wireless **Notebook** computer

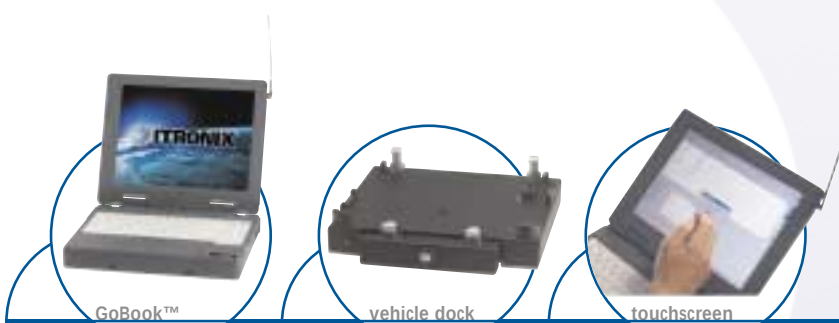

## highlights

- Latest PC technology
- Integrated communications
- Built-in flexibility
- Itronix tough
- CRMA™ wireless technology

## Itronix, the company that invented rugged, wireless computing, now offers GoBook™

The GoBook is the first rugged notebook to combine the latest PC technology, integrated communications, plus affordable toughness. The most fully featured and affordable notebook computer in its class, the GoBook is a high-performance wireless communications tool. It meets military standards for ruggedization, incorporates multiple data input options, and an innovative outdoor viewable Colorvue™ display. The GoBook allows you to maximize your ROI by offering easily upgradeable Memory, Hard Drives, Wireline LAN, and Radio Modules.

GoBook sets the industry standard for rugged wireless computing.

## product specifications

|                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|--------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Compact Size:</b>                       | Length: 12" (30.5 cm) • Width: 9.8" (24.9 cm) • Depth: 2.2" (5.6 cm)                                                                                                                                                                                                                                                                                                                                                                               |
| <b>Weight:</b>                             | 7.5 lbs. (3.4 kg)                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| <b>Processor/Memory:</b>                   | 600 MHz Intel Celeron processor with 128 KB L2 Cache or, 700 MHz Intel Pentium III processor with 256 KB L2 Cache • 64 to 256 MB SDRAM                                                                                                                                                                                                                                                                                                             |
| <b>Storage:</b>                            | Shock mounted 2.5" 10 GB or 20 GB Ruggedized hard disk drive                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Power:</b>                              | Smart 5400 mAh (58.3W) Lithium-Ion main battery pack • 3100 mAh (34.4W) Lithium-Ion media bay battery pack                                                                                                                                                                                                                                                                                                                                         |
| <b>Display:</b>                            | 12.1" TFT SVGA Outdoor Colorvue display with Anti Glare and Touchscreen • 2X AGP 3D Graphics Engine with motion compensation • Support for 64 bit internal graphics acceleration with integrated 8 MB SGRAM. XGA through external VGA port                                                                                                                                                                                                         |
| <b>Keyboard:</b>                           | Fully waterproof NiteVue™ glow-in-the-dark keyboard, constructed from phosphorescent plastic • Available for US/Canada, Germany, UK, France, Spain/Mexico, and Italy • User replaceable                                                                                                                                                                                                                                                            |
| <b>Pointing Device:</b>                    | Touchscreen • TouchPad 3 button controls                                                                                                                                                                                                                                                                                                                                                                                                           |
| <b>Operating System:</b>                   | Microsoft® Windows 98, Windows 2000 • OS Support for US/Canada, UK, Germany, France, Spain/Mexico, and Italy                                                                                                                                                                                                                                                                                                                                       |
| <b>Interfaces:</b>                         | Swappable media bay internal 24X CD-ROM, DVD-ROM 8X or 3.5" Floppy disk drive • PC card slot for (1) Type I, II, or III card with 32 bit card bus and support for zoomed video • Built-in RJ-11 and RJ-45 jacks for integrated fax/modem and ethernet • USB connector • PS/2 connector for keyboard/mouse • 9 pin high speed serial port • 25 pin ECP/EPP parallel port • 15 pin external video (CRT) port • External speaker and microphone jacks |
| <b>Audio:</b>                              | Internal microphone and (2) speakers • PCI Audio with AC-97 compliance                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Integrated Wireline Communications:</b> | 56 Kbps V.90 fax/modem or 10/100M bit Ethernet LAN fax/modem combo • Mini-PCI module                                                                                                                                                                                                                                                                                                                                                               |
| <b>Integrated Wireless Communications:</b> | CDPD, Motient (ARDIS), Cingular (BSWD), GSM, Wireless LAN                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>CRMA™ Wireless Technology:</b>          | Common Radio Module Architecture (CRMA™) with fully integrated, rugged and user replaceable radio modules • Supports PCMCIA and OEM radio modules • Engineered for minimum radio desense to offer maximum wireless coverage • Superior wireless power management                                                                                                                                                                                   |
| <b>Options:</b>                            | Vehicle power supply • Vehicle dock with lock, power, (2) USB Interfaces, and RF contacts for external vehicle-mounted antennas • Carry cases for system and accessories                                                                                                                                                                                                                                                                           |
| <b>Environmental Specifications:</b>       | Die-Cast Magnesium for all structural components • Operating temperature -23° – 60° C (-10° – 140° F), Storage temperature -55° – 75° C (-67° – 167° F) • 26 repeated 3ft drops Meets MIL-SPEC 810E, 516.4 IV • Rain/ Water resistance at 4 in. per hour at approximately 40 ps on all 6 axes per MIL STD 810E, 506.3 III • Dust per MIL STD 810E, 510.3 I • Vibration per MIL STD 810E, 514.4 I                                                   |
