

LASER RAMAN SPECTROMETER

Table of Contents

1. System Engineering

- 1.1. Analysis of current technology
- 1.2. Define Requirements
- 1.3. Identify risky elements
- 1.4. Requirements Doc and work break down structure, statement of work, prelim test plan
- 1.5. Conceptual Design (With BOM)

2. Preliminary Design

- 2.1. Prototype risky elements
- 2.2. Develop conceptual design
- 2.3. Test reports
- 2.4. First draft of final test/installation plan
- 2.5. PDR

3. Detailed design

- 3.1. Finish design
- 3.2. Finalize test plan
- 3.3. CDR
- 3.4. Final drawings
- 3.5. Test procedures

4. Fabrication

- 4.1. Monitor and support in-house and outside fabrication

5. Integration & Test

- 5.1. System Integration
- 5.2. Subsystem and system testing
- 5.3. Laboratory Test report

6. Field Test

- 6.1. Mobilize for field test
- 6.2. Test
- 6.3. Field test report

7. Installation

- 7.1. Support to Ops and Science

8. Documentation & training

- 8.1. Operation & Maintenance manual
- 8.2. Training
