

706001 Transforming USGS Ecosystems Observing Capacity with Long Range AUVs

Rating: 1

MT contact: Doug Au

Management Team Feedback

General Comments:

How does the team plan to accomplish goal #2 in the proposal (measuring zooplankton abundances and the degree of spatial correspondence to phytoplankton across Lake Michigan)? This does not seem possible with the LRAUV alone.

For Phase 2 please address the following:

Does this conflict with the timing of other field operations (e.g., CANON)? It would be useful to develop a master calendar of operations to avoid conflicts with the suite of projects utilizing the LRAUV.
