

PART NUMBER: V78XX-500 series

DESCRIPTION: DC switching regulator, non-isolated

description

The V78XX series of switching regulators are designed to replace 78XX linear regulators, with the objective of drop-in replacement without the need for a heatsink, because the V78XX series features high efficiency under all line conditions. Built-in short-circuit and over-temperature protections ensure very rugged operations. Additionally, low ripple and noise performance make the parts useful in a wide range of applications.

features

- efficiency up to 96%
- no need for heatsinks
- wide input range
- short circuit protection
- thermal shutdown
- low ripple and noise
- pin compatible to LM78XX series
- non-isolated

THERMAL DERATING CURVE

PART NUMBER: V78XX-500 series

DESCRIPTION: DC switching regulator, non-isolated

TYPICAL APPLICATION CIRCUIT

INPUT CAPACITOR (C1):

A low ESR capacitor is recommended to keep the noise at the converter to a minimum. Ceramic capacitors are preferred but tantalum or low ESR electrolytic capacitors may also suffice. Place C1 as close as possible to pins 1 & 2.

OUTPUT CAPACITOR (C2):

A 100μF/25V electrolytic capacitor is recommended.
