Subject: Osprey Camera Question
Attachments: OE1323 Technical Manual.PDF

Hello Alana,

Your recent e-mail sent to our factory in Scotland has been forwarded to me. And, it's my pleasure to be of help.

FYI, our "standard" factory wiring for the LPBH4M connector was as follows, although there is no guarantee that your camera has been wired this way as many of our customer have specific wiring for their systems:

Pin 1 - 0Volts/Video Screen
Pin 2 - 16 to 24 VDC
Pin 3 - Video Out
Pin 4 - N/C

Attached is a manual which may help you further if you follow the wiring on page 41.

Let us know if we can be of further help...our pleasure, Alana!

All the best...JB
