

802 Enhanced Dorado

Rating is contingent upon the project team following recommendations made by the Management Team.

Management Team Contact: Steve

Rating: Some possibility of being approved

Management Team Feedback:

The management team supports improving the AUVs but we recommend a more phased approach. With the GOC expedition and other exciting AUV modifications being proposed in 2008 we would look more favorably on a proposal to just replace the stepper motors to improve energy utilization first and then revisit the additional recommended upgrades in later year proposals.
