

901012 Imaging AUV

Rating: Likely to be approved

MT contact: Doug Au

Management Team Feedback:

For your proposal, work with the Biodiversity initiative and the MPA proposal teams to better connect this tool to their goals. It would strengthen this proposal if there were a plan for technology transfer where other organizations would want to copy our designs and methods. It would be good to tie each planned upgrade for the BIAUV to a specific need outlined in either the Biodiversity initiative, the MPA project or any other project proposing to use this system in the future. Working in rough terrain would seem to be a high priority for MPA studies.
