Overview

CPC1600 is a PC/104-Plus single board computer designed for mission critical embedded systems.

The board is based on Intel® Pentium® M processor up to 2.0 GHz, 915GM & ICH6 chipset.

All components including memory are soldered onboard thus providing superior shock/vibration standing construction.

The board also has a 32 MB solid-state disk for embedded OS.

Video system supports CRT-monitors and flat panels with LVDS interface with resolution up to 2048×1536.

Peripheral devices can be connected to CPC1600 through 6 high-speed USB 2.0 channels.

Two Gigabit Ethernet channels make this board perfect for developing communication intensive applications.

The board supports drives with IDE UltraATA/100, SerialATA interfaces and CompactFlash Cards.

The board is available in conduction or convection cooling versions.

Additional reliability of CPC1600 is provided by the hardware monitoring subsystem, watchdog timer and reserved CMOS memory.

The board is available in two versions – for industrial temperature range (-40°C to +85°C) and for commercial temperature range (0°C to +70°C).
