

Thermal Curve Calculator

Select desired Heatsink Part # (RoHS / non-RoHS) or Product type:

30190 / 15971

This is for a: MICRO

Is this for a Front End Module? (Y/N)

Y

Enter Device's Maximum Output Power:

100

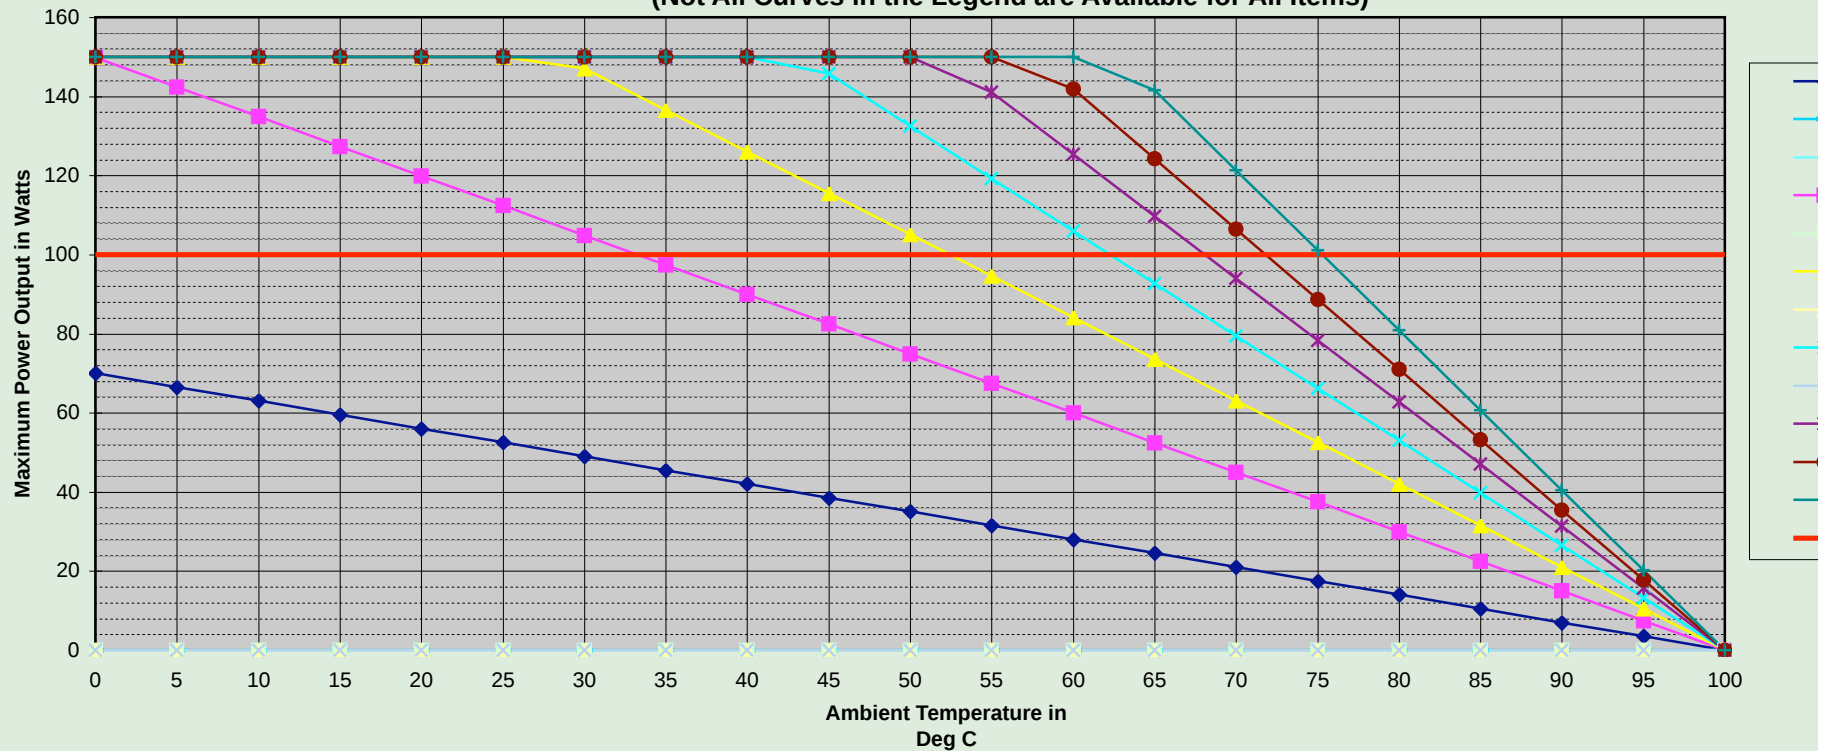

Enter Minimum Expected Efficiency in %:

79

This Calculator assumes the efficiency constant over all line and load conditions. In the real world this is not the case. Please verify efficiency if your application deviates from nominal. *Verify all thermal management designs experimentally*

Thermal Curves for Selected Item

(Not All Curves in the Legend are Available for All Items)
