

Thermal Curve Calculator

Select desired Heatsink Part # (RoHS / non-RoHS) or Product type:

30189 / 15989

This is for a: MINI

Is this for a Front End Module? (Y/N)

Y

Enter Device's Maximum Output Power:

200

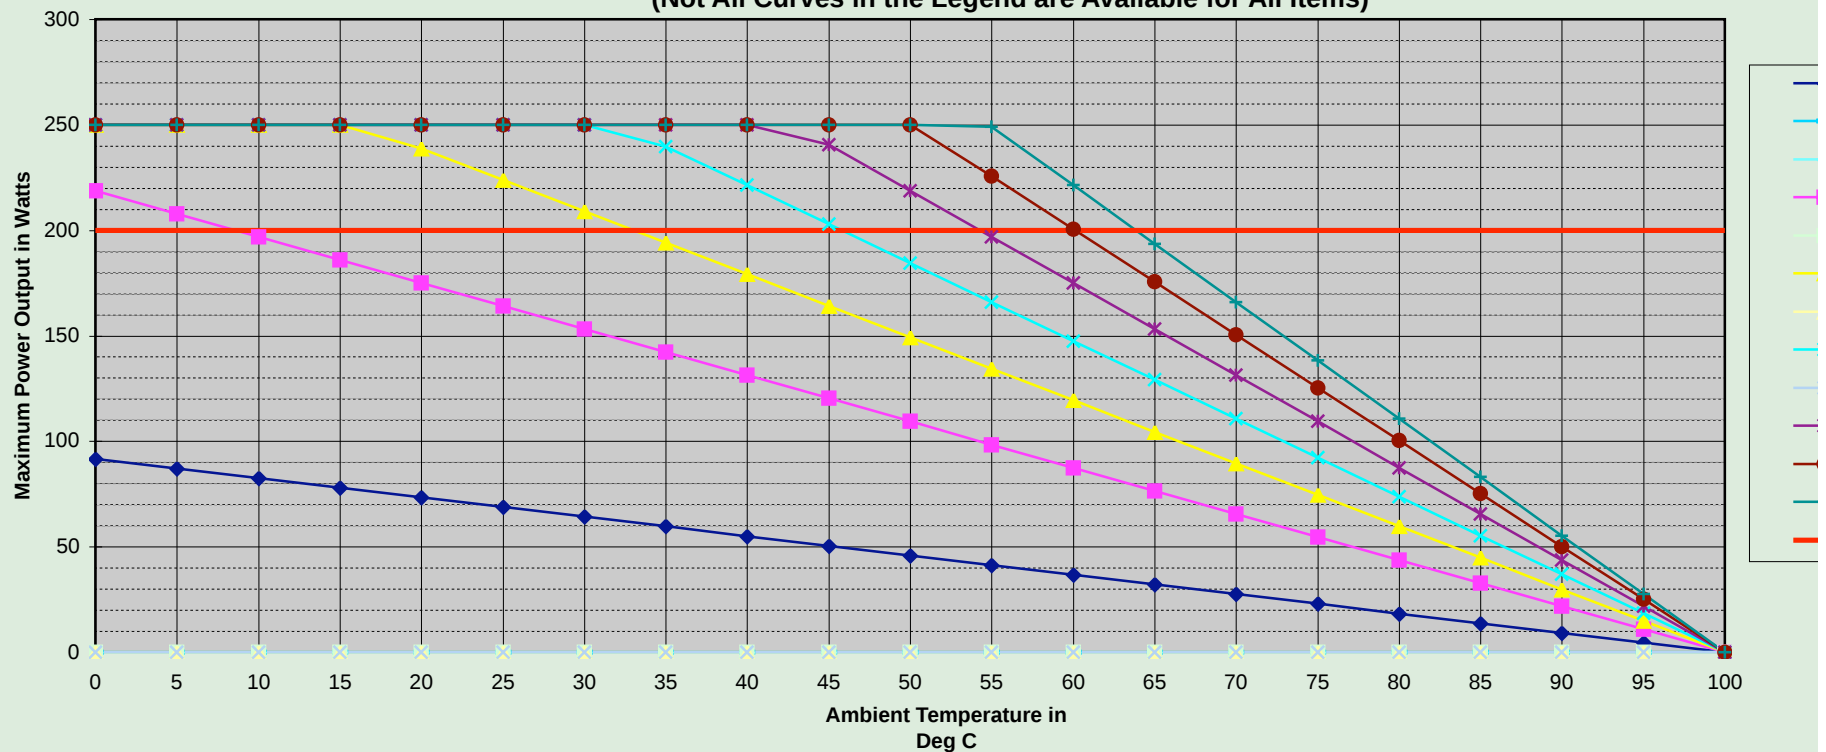

Enter Minimum Expected Efficiency in %:

79

This Calculator assumes the efficiency is constant over all line and load conditions. In the real world this is not the case. Please verify efficiency if your application deviates from nominal. *Verify all thermal management designs experimentally*

Thermal Curves for Selected Item

(Not All Curves in the Legend are Available for All Items)
