

Program Number N° 11228

Name of the program : **BENTHIC EVENT DETECTOR - SUB PROGRAM**

Program administrator : **HOBSON BRETT**

This program was approved on **23 November 2012**

Starting date : **23 November 2012**

Ending date : **22 November 2015**

Here are your access codes to your Argos data (please make sure to keep them confidential)

Username : **BENTHICSUBPG**

User password : **BEDMBARI**

Platform affectation

CLS Argos is the unique organization authorized to allocate Argos ID numbers. Each platform being characterized by only one number, users are requested to take care in handling these numbers. It is mandatory to distribute the repetition period allocated to the platform over the range + or - 10% of the proposed value.

Please find the **4** ID number(s) requested :

<u>Decimal</u>	<u>Hexadecimal</u>	<u>Repetition period</u>	<u>Last applied template</u>
149701	DFB5C5F	90	GEN - 31*8BITS A1
149702	DFB5C6A	90	GEN - 31*8BITS A1
149703	DFB5C79	90	GEN - 31*8BITS A1
149704	DFB5C8B	90	GEN - 31*8BITS A1

IMPORTANT NOTICE :

CLS Argos does not assign specific frequency channels to Argos platforms. For better transmission performances, it is strongly recommended to use the entire "Argos 2" bandwidth from 401.620 MHz to 401.680 MHz while keeping out of the "Argos 1" central part of the band (401.646 MHz to 401.654 MHz).

For further information and to know the best transmission strategy (duty cycle, repetition rate and frequency choice) before deploying platforms in a particular geographic area, do not hesitate to contact your useroffice.
