

BPWL1600 Lithium Battery Pack for Workhorse ADCP

The Workhorse lithium battery pack gives you three times the capacity of standard Workhorse Alkaline packs. Its 33 VDC nominal operating voltage is in an ADCP's optimal voltage range. Its voltage stays almost constant through its operational life, which gives you consistent performance throughout your deployment.

Part number: BPWL1600

Price: \$750, each pack

Specifications

Capacity ¹		
(Watt-hours)	(kJ)	@ Temperature
1350	4800	0° C
1500	5400	10° C
1650	5900	20° C
1450	5200	37° C

¹ The above capacities are based on tests. However, ADCPs vary widely in how they draw energy from battery packs, so these packs should be used conservatively until you gain experience with specific applications (see [Estimating how much battery capacity your deployment consumed](#)).

Nominal voltage

34 VDC @ 20° C
