

SAAB

On the occasion of the

SUBSEA TIEBACK FORUM & EXHIBITION

5-7 MARCH 2013

Henry B. Gonzalez Convention Center, San Antonio, Texas

Saab Seaeye, working closely with Saab North America
is introducing new technologies to our offshore oil and gas clients.

Designed as part of the next generation in subsea vehicles, the Sabertooth will
be able to carry out a wide range of tasks such as ultra-long tunnel inspections
and deep water touchdown monitoring, as well as those which require a subsea
resident vehicle with an impressive array of sensors and tooling.

We invite you to come and see the Sabertooth first-hand at this
year's Subsea Tieback Forum & Exhibition.

We'll be presenting our cutting-edge subsea technologies at the event and
would like to tell you more about the benefits of working with Saab.

Please visit us at booth **676**.
