Quotation No. HP-305

Date: May 29, 2018

Expires: July 29, 2018

Delivery: 8 week ARO

Terms: Net 30 days

ITEM	DESCRIPTION	PRICE
High Pressure cell		
HP200	High-pressure cell for absorption, fluorescence and Raman spectroscopy with three (3) optical windows. The cell works up to 3 Kbar with quartz windows and 4 Kbar with sapphire windows. The pressure regulation is hydrostatic. The vessel comes complete with temperature control circuit through a liquid circulating bath (not included), 3 windows, two round cuvettes, round and square cuvettes holders, nine (9) I-seals, 1/8"-diameter flexible tubing for connection to the pump, storage fixture and handling tools. <i>(specify an adapter, which is required for circulating the temperature control liquid and for mounting the cell)</i>	\$14,430.00
HP411	Manual pump for pressure cell systems working up to 6 Kbar (87,000 psi). The pump, mounted on a baseplate, comes complete with digital pressure gauge and valves. It is connected to the high pressure cell by a flexible, high pressure, 1/8"-diameter tubing.	\$7,500.00
HP650	Adapter for liquid circulator with mounting holes for fixing the cell onto a flat surface.	\$1,200.00
Total FOB Champaign		\$23,130.00
Installation		\$3,000.00
Total		\$26,130.00

Accessories and Replacement Parts

HP460.1	Qty. 1 quartz window for pressure cell Mod. HP200/HP201.	\$160.00
HP500	Plastic Cuvette Cap Tubing (length 2 feet).	\$50.00
HP482	Set of 9 I-seal gaskets.	\$90.00
