**MAKE THE MOST
OF IRIIDIUM**

iridium®

XEOS ONLINE

Xeos Online is a web-hosted application that streamlines and facilitates the management of all your Iridium devices. A single source for device management, team setup, notification and alarm management, data collection, analysis, and billing, Xeos Online puts it all at your fingertips. Mobile ready and cross-browser compatible, be in control from anywhere.

MAPPING & OVERLAYS

Incorporating the OpenStreetMap framework, street level maps are used to display location information without annual license fees. Incorporate third party data overlays such as marine charts, satellite imagery, and reference or historical information. Beyond static information, ask about dynamic overlays such as automatic updating of meteorological information.

PROJECT ADMINISTRATION

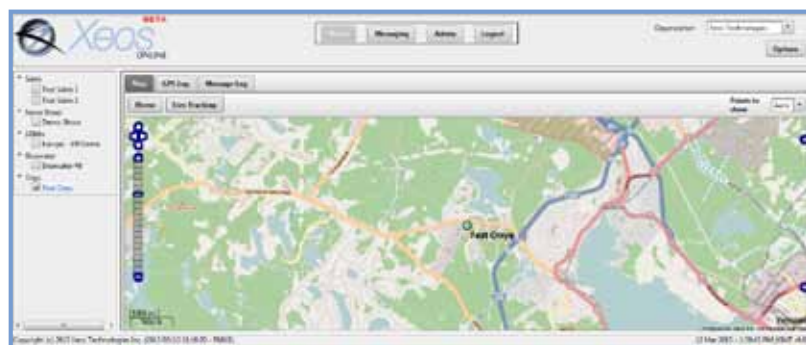

Manage multiple divisions, teams, projects and devices easily with three levels of user role. Secure communications available with encrypted messaging. Access to detailed data call information including real time billing information facilitates project management.

HOSTING OPTIONS

Subscribe to the Xeos Technologies hosted version of Xeos Online and customize your dashboard for your organization. Xeos will manage global administrative changes and server responsibilities and the customer controls the rest. Alternately, purchase a server license and host it in house for maximum control and security. Branding options available upon request.

- Online** ACCESS, ANALYZE, ADMINISTER FROM ANYWHERE
- Organization** CENTRAL LOCATION FOR DATA, BILLING, CONTROL
- Billing** FULL TRACKING OF DATA AND SERVICE CHARGES
- Secure** MULTIPLE ROLES, NOTIFICATION, & ENCRYPTION OPTIONS
- Intuitive** INTUITIVE GRAPHICAL INTERFACE, MOBILE READY

INTEGRATING YOUR IRIDIUM NEEDS

SERVICE - YOUR IRIDIUM VAR

Xeos Technologies provides a range of data services for interested Iridium users ranging from communication service packages, to modem sales to custom engineering support. Expert in the use and extension of SBD (Short Burst Data), CSD and RUDICS in both the commercial and DOD gateways.

Short Burst Data (SBD) is ideal for pole to pole transmission of small data packets. CSD is a commercial service for large amounts of data transmission which requires no up front investment. RUDICS is a system for long term large data burst transmission which requires an up-front investment but is more cost-effective per data packet. Xeos offers a tunnel application for single connection transmission of 1.1 MB/hr.

- Comprehensive hardware selection
- Full complement of Iridium service plans
- Flexible billing arrangements, online access through Xeos Online
- Access to real time data consumption records
- Competitive pricing and volume discounts
- 24 hr activation service

SBD PLAN	SERVICE	DATA INCLUDED
Plan 0	Monthly SBD, unlimited account changes. No activation fee	0 kb
Plan 12	Monthly SBD, unlimited account changes. Activation fee	12 kb / month
Plan 17	Monthly SBD, unlimited account changes. Activation fee	17 kb / month
Plan 30	Monthly SBD, unlimited account changes. Activation fee.	30 kb / month
Suspension	Suspend any account for a minimum monthly fee	

Please contact us for details on telephony, CSD and RUDICS plans and for pricing.

OEM SERVICES

Contact Xeos to discuss your OEM needs, be it standard hardware at very competitive volume discounts, exceptional Iridium based packages with fully functional API, service or engineering support. Private label agreements for hardware and software applications are also available. Xeos is committed to providing tailored, premier service at all levels to OEM customers.

ABOUT XEOS

We are a leading technology firm created by visionaries with a passion for excellence. Xeos designs and manufactures application specific tracking and monitoring products for environmental researchers, wildlife researchers and operational personnel.

With decades of design experience in the scientific, law enforcement and military markets we understand how to design for success in the world's harshest environments.

We are confident that once you experience our open and collaborative approach, you'll wonder why it took so long to find us. We are always available to answer questions, discuss potential projects, or support your operational objectives.
