

901411 Wave Glider Hot Spot

Rating: Likely to be supported

MT contact: Doug Au

Management Team Feedback:

We appreciate the Hot Spot team's goal to improve upon and complete the delivery of the Hot Spot system in 2016. You have made great progress so far.

For Phase 1, can you please clarify if the task for improving target location accuracy is being coordinated with project #901605, led by Jordan Stanway? As written it appears to be a separate external collaboration that could be a duplication of effort.

Also, the management team is currently compiling a comprehensive list of Wave Glider-related features that MBARI has created to present to Liquid Robotics for discussion. Therefore, in addition to your proposal, please provide a list of capabilities this project is creating for use on Wave Gliders.
