

4-Channel Analog Input Module ± 10 V/0-10 V

Single-ended (S.E.)

Fig. 750 Series/Technical data see page 24/Delivered without miniature WSB markers
 750/753 Series marking see pages 12 ... 13 / 14 ... 15

The analog input module receives signals with the standardized values ± 10 V and 0-10V.

The input signal is electrically isolated and will be transmitted with a resolution of 12 bits.

The internal system supply is used for the power supply of the module.

The input channels of a module have one common ground potential.
