

Instructions for using the Promotion Code for Raven Pro

As a registered participant of the Sound Analysis Workshop, you are entitled to a \$100 discount for Raven Pro. To claim this, you need to use your SAW Promotion Code.

Your Promotion Code is: SAW-X2VPHY

You can apply this discount to one of the following licenses:

1. Subscription (RAVENPRO-SUB), which lasts for one year (regular price \$100).
2. Standard (RAVENSTA), which is permanent (regular price \$400).
3. If you're a student: Student (RAVENPRO-STU (renewed for free until you graduate) (regular price \$100).

You can delay the start of the license for up to one year after the end of the workshop, but we recommend starting it before you come so that you can practice and become familiar with the basics (see the Recommended Preparation in the "SAW_Information and Preparation" pdf). You can download Raven Pro to one computer now and use it on another computer later. The one limitation is that you should not have it running on both computers concurrently. You can also install more than one version of Raven on the same computer with your license. Once you have installed one version, Raven will automatically find the registration information if you install another version.

Which version to install: You are entitled to download more than one version of Raven. If your computer has a 32 bit operating system, you will want to install 32 bit Raven Pro, and if your computer has a 64 bit operating system, you may install both 32 bit and 64 bit versions of Raven Pro. For a comparison of these options, read

<http://www.birds.cornell.edu/brp/raven/RavenDownloadBeta.html>.

For the workshop, please download Raven Pro 1.5 beta build 21. NB. The first time it opens, it will give you the option of accepting updates. Say yes. It will close and reopen as build 23 Yosemite, Windows 8 and Windows 8.1 computers: At present, Raven does not officially support Raven in these operating systems. However, most people have installed it with few problems.

Yosemite users, please see "Installing Raven on Mac OS X.pdf", or here

<http://ravensoundsoftware.com/forum/showthread.php?t=7967>.

See next page for instructions

Instructions for using your code to download Raven

- Go to his page: http://store.birds.cornell.edu/Raven_Pro_p/ravenpro.htm
- Enter "1" under Quantity for which of the 3 licenses above you want to apply the discount to,
- Add to cart.
- On the next page, enter your Promotion Code.
- The system will send you an email with a registration number.
- Once you have that, go to the Raven Pro download page
- <http://www.birds.cornell.edu/brp/raven/RavenVersions.html>
- Download the appropriate version for your Operating System.
- As part of the download procedure, you'll be asked to enter your registration number, followed by your email address. So copy and paste the registration code from the email

Installation Tips

- Windows -- We recommend installing Raven in the default path. Installing in C:\Program Files will not work.

If you have any problems with installing Raven, please contact raven_support@cornell.edu, but please copy me (Liz, edr6@cornell.edu) on the email so I can keep up do date. Have fun!
