Description

2 Megapixel CMOS NIR enhanced camera for extreme environments - GigE Vision®

Prosilica GT2000 NIR is a 2 Megapixel camera equipped with a NIR optimized variant of the CMOSIS CMV2000 sensor. At 900 nm this sensor offers double the quantum efficiency, an increase from 8% to 16% absolute. GT2000 NIR is a rugged camera designed to operate in extreme environments and fluctuating lighting conditions. GT2000 NIR offers Precise iris lens control allowing users to fix the aperture size to optimize depth of field, exposure and gain without the need for additional control elements.

Options:

- Various lens mounts
