

cm), the outside diameter is 5" (12.7cm). The GPH offers a 0.4" x 2.5" (10.5cm x 6.3cm) internal space area that can be used for streamlined POV cameras such as Sony, JVC, Drift, Contour, Bullet, etc. It can be used with a Raspberry Pi 3/4/5 or similarly sized micro processor. This housing features an acrylic lens. This canister can also be drilled to interface with a Abysso/Benthic via a waterproof connector. Well Made in Florida, USA.

Our clients use this canister to house:

- Flashlight/ video lights
- Lasers
- Additional battery /control boards
- Sensors
- Board level cameras, batteries and control boards (Arduino type).

As you can see, its use is only limited by your imagination
