Dear Ian:

Pursuant to my last below, please note that today at 1655 EST, ECM QI (myself) received a call from Mr. Todd Van Epps, Duty On Call Person of the California Dept. of Fish and Wildlife asking a few questions about the incident to the Paragon which were answered to him. Mr. Van Epps also asked to speak directly with you and will contact you directly on your cellphone number which was given to him.

In addition, attached please find a copy of the California Office of Emergency Services report generated after ECM's notification for your records.

Please contact ECM should you need any assistance or have any questions.

Best Regards,

**Regulatory Compliance Leadership****Mauro Ceruzzi**

Subject: Vessel; Paragon ON: 993613 fuel sheen

Dear ECM,

While starting the vessel Paragon today we noticed some fuel sheen emitting from the port outboard engine cooling water. The vessel was moved back to it's dock at MBARI, Engines raised from the water and oil booms placed around the outboards. No active sheen was noticed after shutting off the engine. Estimated quantity was less than a gallon. I have left a message on the 24 hour number and would appreciate a call back to discuss further.

Date: 10 February 2021
Time 10:00am to 10:20 am pacific standard time
Vessel: Paragon
Official Number: 993613
Location: Moss Landing at the MBARI Facility
Weather: No wind, No Rain
Tide: High tide at 0900 to ebb tide

Thanks and Regards,

Ian Leik
