

Jan 31st MSC Speed-up Discussion

- Leaving things on?
 - PSUs are MSC - save a second
 - can't leave the lamp on
 - pH could get down to 1-second
 - ISUS maybe down to 3-5 seconds

Actions

- Shorten the pH test cycle
- Power up supplies on wake
- Maybe add delimiter to commands
- Do pH first [CPF]
- Change Spectra Window
- Init command in InitMission.es

MSC System

Profile Sequence

1. Power MSC
 - ↳ +12V comes on (WAKE)
2. Sample Both (T BOTH) (T1/T2)
 - a. Spec
 - b. Lamp
 - c. pH
3. Get Data (unsolicited)
4. Turn Off
