To Whom It May Concern,

I am pleased to recommend Campbell Depken for an REU experience. Campbell is an excellent engineering student. She is enthusiastic and is willing to work hard to get the most out of her coursework.

Campbell has proven herself to be an excellent student. Her grades show her ability to master academic work. Campbell is completing a very challenging Electrical Engineering degree while working toward two very different minors. Campbell intends to use these minors once she graduates. In addition, she has maintained a perfect GPA while continually taking a full course load, working, and staying active on campus.

I have been Campbell's academic advisor since she entered the department and am currently teaching her in a class. She is performing well in the class and regularly participates in classroom discussions. Campbell is a very well-spoken and friendly student. She gets along with her peers and is always willing to help others when they need it. For these reasons, I am happy to recommend Campbell for an REU position.

If you have any questions, please feel free to contact me.

Sincerely,

Cecilia Townsend
Coordinator of Advising and Senior Lecturer
Electrical and Computer Engineering
North Carolina State University
