LASH-IT™ AND ZING-IT™

Lash-It! yields the highest strength, lightest weight, lowest stretch, and longest wear life available. The Samthane coating adds to the twine's wear life, ensures its knot-holding capability, and gives it a distinctive gray or yellow color. Zing-It! offers extremely high strength while Samthane urethane coating provides excellent abrasion resistance and an easy gliding surface. The exceptional low stretch allows for control, and Zing-It! is conveniently packaged to achieve higher throws with lighter weight.
