
Integrable ACT 201 H “mini Board” controller

Description

Electronic board option can be substituted for the box version of the ACT 201 H controller: when useful the pump has to be integrated into a complex installation or equipment.

The board provides a speed variator, logic remote control and all the necessary securities.

The “mini Board” requires a 24 V DC supply and includes RS 232/RS 485 serial links.

ACT 201 H mini Board

ACT 201 H “mini Board”

Technical characteristics (**see A 91**).

Power supply and remote control wiring (**see B 81**).

RS 232 or RS 485 serial link wiring (**see B 91**).

Non binding picture.
