

For more than forty years, the Vacuum Technology of Alcatel, a subsidiary of the Alcatel Group, has been supplying pumping and leak detection systems to industry and research laboratories world-wide.

The company's products are designed and manufactured in the heart of Europe and are distributed by a global network of subsidiaries and representatives which ensures that customers always benefit from quick service.

Alcatel Vacuum Technology France has developed an international network which is capable of servicing the world's major industrial regions. The first step was the founding of Alcatel Vacuum Products, in the United States over twenty years ago. In Europe, Headquarter AVT-France and four of its subsidiaries, Alcatel Hochvakuum Technik (Germany), Alcatel Vacuum Technology (Great Britain), Alcatel Vacuum Systems (Italy) and Alcatel Vacuum Tehnology Belgium (Netherlands) form the foundation for a network of partners covering the entire continent. In Japan, the addition of Alcatel Japan with its 20 years of experience in the country strengthened the network in 1993. Since 1995, AVTK our subsidiary in Seoul, and AVT Taiiwan since 2001, reinforce our presence in Asia. This organization is rounded off by more than thirty representatives based in a variety of continents.

Thus, whatever the circumstances, the users of Alcatel products can always rely on the quick support of our specialists in Vacuum Technology.
