

Applications of the Environmental Sample Processor (ESP) to Harmful Algal Bloom Management: Field Deployments, Technology Transfer, and Commercial Evaluation

Table of Contents

	<u>Page</u>
Volume 1: Technical Proposal	1-7
A. Project Summary/Abstract	1-7
B.1 Statement of Work	1-7
<i>B.1a Project overview and rationale</i>	1-7
<i>B.1b Development and current status of the ESP system</i>	1-8
<i>B.1c Specificity, sensitivity, and calibration of the ESP</i>	1-11
<i>B.1d HABs in the Gulf of Maine and the Nauset Marsh System: testing the ESP in both protected shoreline locations and open coastal waters</i>	1-13
- shallow, dock-based system-Salt Pond	
- open water- western GOM	
- modeling and data assimilation efforts	
<i>B.1e ESP commercialization status</i>	1-15
B.2 Project Plan	1-15
<i>Task 1. Production of ESPs and technology transfer from MBARI to NOAA and WHOI</i>	1-16
<i>Task 2. Laboratory studies of specificity, sensitivity and precision</i>	1-16
<i>Task 3. Field testing in different application settings</i>	1-16
<i>Task 4. Assimilation of ESP data into nowcast/forecast models</i>	1-18
<i>Task 5. Develop a strategy for commercializing the ESP</i>	1-19
B.3 Leveraged Activities	1-19
C. Project Schedule and Milestones	1-20
D. Assertion of Data Rights.....	1-21
E. Deliverables	1-21
F. Management Approach.....	1-21

G.	List of References	1-21
H.	Curriculum Vitae	1-25
I.	Ship Use Request	1-36
	Appendix 1. NOAA Marine Biotoxins Laboratory statement of work	1-39
	Appendix 2. Letters of collaboration and support	1-42
	Michael Mathewson, MacLane Research Laboratory Inc.	1-43
	Chris Melancon, Applied Biosystems Inc.	1-44
	Richard Stumpf, NOAA.....	1-45
	Linda Mercer, State of Maine Department of Marine Resources.....	1-46
	Michael Hickey, Massachusetts Division of Marine Fisheries.....	1-47
	Michael Mickelson, Massachusetts Water Resource Authority	1-49
	Volume 2: Cost Proposal	2-1
