

300079 - DMO Support - Rachel Carson

Week 48

1. Kevin Gomes
 - a. Helping DJ with a spare Moxa while the boat will be in the shipyard

Week 40

1. Kevin Gomes
 - a. Testing of new VSat system (thanks Adriana for the huge amount of work!!!)

Week 33

1. Kevin Gomes
 - a. Meetings, etc. for microwave decommissioning and move to new VSat system.
2. Paul McGill
 - a. Continue to work with Paul C to decommission microwave equipment on the Carson and remove what's no longer used.

Week 27

1. Kevin Gomes
 - a. Some dataprobe troubleshooting (turned out to be a 2nd instance running in the background)

Week 25

1. Kevin Gomes
 - a. Documentation updates for the start/stop GSS logger

Week 16

1. Paul McGill
 - a. Spent many hours troubleshooting microwave system with Paul C., Ariana, and Alana, and had partial success but it needs more tweaking.

Week 15

1. Paul McGill
 - a. Troubleshooting error with RC's Sea Tel dish-pointing system.

Week 10

1. Paul McGill
 - a. Met with DJ about RS-485 comms to new ROV winch.

Week 9

1. Jon Erickson
 - a. J-Box review.

Week 7

1. Kevin Gomes
 - a. Finalized fixes in ArcMapNav to get upgrade deployed on Carson (then on Flyer when it returns)

Week 5

1. Kevin Gomes
 - a. Microwave data link still down so we have no way to remotely support the ship currently.

Week 3

1. Kevin Gomes
 - a. Spinning up the ArcMapNav work again and trying to get the patched version deployed soon.
 - b. Looking into touch screen issues on Carson
 - c. Finalizing NAS config for deployment on Carson (probably during next maintenance period which is OK at the main machine that uses it is back at Stealth for RMA work).

Week 2

1. Kevin Gomes
 - a. Trying to get back to the ArcMap nav upgrade that I started before the holidays. Fix is in, I just need to get the build done so that it can be installed on both ships.

Week 1

1. Paul McGill
 - a. Interviewed candidate for ROV pilot position.
