Kyle Van Houtan, PhD
Monterey Bay Aquarium
886 Cannery Row
Monterey, California 93940

REPORT OF ANALYSIS

One box labeled "MBA-KV-001" was received on 17 September 2020. The materials on the slides in the box were analyzed using Raman spectroscopy. Most of the samples could be analyzed using a 532nm laser and a few additional samples were analyzed using a 780nm or 785nm laser.

The spectra are enclosed for your reference. The spectra are being provided in CSV format by email.
