Path Warnings Document

*This document provides important information regarding FCC restrictions that may apply to the system you are planning. **This list is intended as an informational guideline and is not guaranteed to encompass all possible licensing issues that may arise.** In some instances the restrictions are minor, but in other instances there may be a significant impact upon your system implementation. Comsearch recommends that you review this document carefully and consult with your Comsearch Engineering contact if you have any questions or concerns.*

1) CANNERY ROW – MT TORO Monterey Bay Aquarium Research Inst

18.0 GHz

FCC Rule Part(s)	Description	Result / Action
N/A	Path length exceeds the maximum range for the band selected.	Verify Coordinates
N/A	MT TORO using older revision of antenna. No action needed unless antenna is brand new.	Verify if antenna is new
1.924 (f) (2)	CANNERY ROW Frequencies between 17700–19700 MHz within the DOD Quiet Zone San Miguel are less likely to be approved by the DOD.	Consider Alternative Frequencies or Frequency band. Not Eligible for Conditional Authorization
1.924 (f) (2)	MT TORO within 18 GHz DOD Quiet Zone – San Miguel.	Not Eligible for Conditional Authorization
