

HVE9100 Version & Contents

Version			The main contents of revision
Integration	Download	Base	
05.81	05.81	7.00	1) Stability improvement of TS over IP in 1000Base-T option. 2) Fixed bug of IPv6 UDP checksum. 3) Fixed bugs of operation and display system.

Notes 1. "an integrated version" is the version for management included to mechanisms, such as a case of equipment, and internal wiring.

Notes 2. "a download version" can be checked by the version display of an equipment operation menu, and builds main encoder ability, such as PLD/firmware.

Notes 3. "a base version" shows versions, such as a monitor program for firmware starting for control.
