

900912 One-Stop Shopping for MBARI Upper Water Column Data

Rating: Likely to be approved

MT contact: Doug

Management Team Feedback:

This is a timely proposal that will provide a foundation for future data systems work. The abstract presentation was very informative and helped to provide the MT with a good picture of our core (and other) data streams.

Propose this as a stand alone development proposal because this has impacts on more than MBARI core data streams.
